## CALV Kit's and Service

The Vesivax® CALV vaccine and immunology research kits have been developed to address the market need for an adjuvant system that is easy to use and consistently stimulates immune responses that are better than commonly used adjuvants such as alum or Freund's adjuvant. Based on the Vesivax® platform technology, CALVs have been engineered so that a vaccine or immunology scientist can quickly and easily couple his or her antigen of interest to the Vesivax® liposome formulations which have been shown to stimulate potent immune responses

### **CALV Reduction Kit**

**\$155.00**

Molecular Express' CALV Antigen Reduction Kit [\[Product Details...\]](#)

### **TLR4 CALV Dosage Kit**

**\$1 775.00**

Molecular Express' TLR4 CALV Dosage Optimization Kit is design to quickly determine the optimal TLR4 concentration range for your experiment [\[Product Details...\]](#)

### **Vesivax® TLR0 CALV Kit**

**\$250.00**

The Vesivax® TLR0 Conjugatable Adjuvant Lipid Vesicles kit is a TLR agonist-free kit for use as a control. [\[Product Details...\]](#)

## VesiVax<sup>®</sup> TLR4 CALV Kit

**\$495.00**

The VesiVax<sup>®</sup> TLR4 CALV kit contains a TLR4-specific agonist to allow users to covalently conjugate the desired target antigen for an easy to use antigen delivery vehicle. [\[Product Details...\]](#)
